

QR Code Enabled Process

Eliminate Manual Errors in Physical Statutory Compliance Checks

....1

QR Codes implemented across **796** branches, (min 12 docs per branch)

....2

500 users installed and used the app simultaneously to update compliance activities

....3

QR Code scanning based task closure

....4

100% accuracy in physical compliance checks

....5

80% time & effort saved

OVERVIEW

The Client: One of India's largest multinational conglomerate formed over a century ago.

Problem Statement: Being a big organization with approx. 800 locations pan-India, accurate compliance with all regulations had become a big challenge for the client. Their compliance consultant's dependent on manual processes were making a lot of non-compliance errors that went unobserved. E.g., the statutory displays of some locations had been interchanged mistakenly and incorrectly displayed. The client was looking for a solution to prevent such cases and errors and to ensure correct compliance at right locations.

APPROACH & SOLUTION

Simpliance came up with the simple solution of using QR codes across all 900 locations. The tasks could be closed only post the QR code scan through Simpliance's mobile application, which ensured correct compliance pan-India. With this shift, we also eliminated any manual requirements from the consultants.

The revolutionary automated Statutory Audit Platform driven by AI & Machine Learning technology runs 100% record's check on all high-risk audit points such as: **Minimum Wages, PF & ESIC Contributions, NFH, Leave Encashment, Bonus etc.**

Simpliance's S.E.A.L Engine (Simpliance Enabled Audit Logic) is helping companies reduce costs by 50% while conducting 100% audit checks of all records submitted and exponentially increasing audit speed. **1,000+ High profile clients.**
